## PROFILE SUMMARY

Final-year B.E. Computer Science (Data Science) student and Python developer with a strong foundation in OOP, SQL, and backend fundamentals. Hands-on practice with Django REST Framework, Celery, and Docker through self-directed projects, plus Git-based version control and debugging in agile environments. Seeking to grow as a Junior Python/Django Developer building reliable backend applications.

## SKILLS

- Backend Development: Python (OOP: classes, inheritance, encapsulation), Django, Django REST Framework (DRF) — practice projects
- Async & Messaging: Basic hands-on practice with Celery for background/async task processing, using Redis as broker
- Containerization: Working knowledge of Dockerfiles, image builds, and container management; basic Docker Compose exposure
- Databases: MySQL, SQL (SELECT, JOINS, subqueries, aggregations, GROUP BY), Django ORM, relational database design
- Tools & Practices: Git, GitHub, VS Code, debugging & troubleshooting, clean code practices, agile collaboration
- Data & ML: Pandas, NumPy, Scikit-learn, Power BI, Matplotlib, Seaborn, Statistical Analysis, EDA

## INTERNSHIP

### Python with Data Science Intern — Robowaves (A Unit of Test Yantra Software Solutions)

Bengaluru, India

Feb 2026 – Present

Write reusable, testable, and efficient Python code, applying object-oriented programming principles including classes, inheritance, and encapsulation to build maintainable software components.

- Design and troubleshoot complex SQL queries — joins, subqueries, aggregations, and data transformations — for analytical and reporting workflows, debugging issues to ensure accurate output.
- Build data visualizations and dashboards using Pandas, Matplotlib and Seaborn to communicate insights clearly to technical and nontechnical stakeholders.
- Develop modular back-end Python scripts and data pipelines, following best practices and contributing to documentation; collaborate with the team in an agile, feedback-driven environment.

## PROJECTS

### Supermarket Sales Analytics — EDA, Dashboard & Business Insights

2026

Python (Pandas, Matplotlib), SQL, Power BI

- Analyzed 50,000+ rows of transactional data using Python (Pandas) and SQL to identify trends, top-performing products, and peak sales hours.
- Built 5+ interactive KPI dashboards in Power BI and applied RFM customer segmentation in Python to improve promotion targeting across 3 customer segments.

### Personal Portfolio Website — Django, MySQL & Admin-Managed Content

2026

Python, JavaScript (Basic), MySQL, Django Framework, CSS, HTML

- Developed a responsive personal portfolio website using Django to showcase projects, technical skills, certifications, and professional information.
- Used MySQL for database management and implemented dynamic project and certification content managed through the Django Admin panel.

### EEG-Based Epileptic Seizure Detection — ML & Signal Analysis

Final Year Project, 2026

Python & Scikit-learn

- Processed an EEG signal dataset of 11,500+ samples into time-frequency spectrogram representations, writing modular, reusable Python feature-extraction pipelines targeting >95% recall across 5 patient datasets.

## CERTIFICATIONS

- Tata – Data Visualisation (Forage, Oct 2025): Built interactive Power BI dashboards from business questions
- Deloitte Australia – Data Analytics (Forage, Sep 2025): Data cleaning, analysis, and visualization in consulting scenarios
- SQL Intermediate – HackerRank: Validated proficiency in complex queries, joins, subqueries, and aggregation

## EDUCATION

### B.E. in Computer Science (Data Science) — Sri Siddhartha Institute of Technology, SSAHE University

CGPA: 8.69

2022 – 2026

### Class XII — Karnataka State Board

86.54% | Languages: English, Kannada, Hindi

2022
